Company

Cintasa is a family company, founded in 1973, and specializes in the design and **manufacture of a wide range of conveyor systems.**

With our own in-house engineering, we design and adapt our equipment to the needs of our clients and to the many different industry sectors and markets.

- Quality
- Innovation
- Experience
- Technology
- Technical service
- R&D
- Assembly
- Design
- Start-up
- Manufacturing
- Flexibility

We design and manufacture equipment and installations for: transport, elevation, storage, handling, dosage, weighing, etc.

Strategy and Commitments

Quality

In **Cintasa** our main objective is the satisfaction of our client, so we pay special attention to the **quality of our products** from the design to the manufacturing.

Cintasa is ISO certified, which applies to the whole process and is renewed periodically. Cintasa has also been awarded numerous awards related to the quality of our **manufacturing and also in respect of the environment**.

Cintasa also has the **ISO 3834**, which certifies the quality requirements for fusion welding of metallic structures.

Mission

To be a leading company in the supply of conveyor systems, able to offer its clients equipment of its **own design** that fulfills all expectations and ensures the growth of the company and the development of its workers.

Vision

Being a company internationally recognized within the conveying sector, offering its clients **high quality equipment** to guarantee their satisfaction, always looking for continuous improvement.

Values

Our values reflect our identity as a company. In Cintasa we care about the **health and safety** of our employees, we are concerned about the environment and we acquire social, cultural and educational commitments in our area.

Resources

Our facilities have an area of 21.000 sq. meters and have been complemented with the most modern production machinery and technical resources.

We have the most **advanced technology**. Therefore our manufacturing process is **faster, convenient and safe** which directly influences our more competitive prices and the highest quality of completion.

Engineering

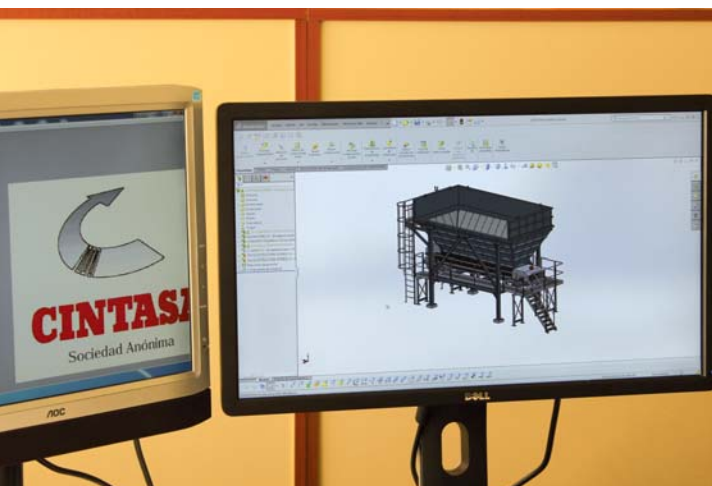

Cintasa has its own engineering and highly qualified staff. This allows us an **exclusive design** adapted to all needs with the reliability that ensures our brand.

In addition, in **Cintasa** we advise to our clients of the best technical solution, finding the most profitable financial investment.

Commitment to **R & D** in order to improve existing equipment designs and also develop new equipment, adapting to new market needs and destination countries.

CINTASA

Products

Cintasa manufactures a variety of conveyors which can be adapted to customer needs. Depending on the characteristics of the installation, the product to be transported and their location, we provided a fully customized solution.

We design and manufacture highly specialized both individual equipment and complete installations.
